

Downloading Maya Software

1. Google "Maya student free download" and click the top listing that comes up called "Autodesk Education and Student Access". That will take you to the correct site.
2. Create an account IN YOUR NAME (Not your child's) using your email. (Autodesk doesn't allow minors to have accounts).
3. Answer all the fields. You'll enter "Student" as your status, and then put "Paper Plane Learning" as the institution. Our address is 9480 South Union Square, Sandy UT 84070 and the website is paperplanelearning.com.
4. You'll be asked to upload a certificate of admittance to a recognized institution. Use the letter pdf emailed to you when you registered for the class.
5. Once you're approved, scroll down to see all the software options you're allowed to use. Select Maya and the platform you're using (Mac or PC), and download.
